Dear Donald:

I am very happy to provide this letter or reference for CRS following our very successful roof replacement project during the spring and summer of 2010. As President of the Iowa Condo Association and Chair of the Association's Roof Committee, I couldn't be happier about the quality of the work, the final outcome, and the ease of working with you and CRS. Between March and September 2010, The Iowa engaged CRS for the largest capital project in the Association's 30-year history. Throughout the entire process, CRS has been responsive to the Association's specifications and requests as well as to direction from our architectural and engineering consultant. CRS took every step to minimize the impact and inconvenience on the community while completing the roof replacement project under budget. CRS personnel were also the utmost professionals and deserve special commendation for their hard work particularly in sustaining the project in the unbearable heat of summer 2010. I want to commend your willingness, as well to meet with me and other committee and Board members on a bi-weekly basis for project review during the entire project.

I am happy to say that I have been able to recommend CRS to neighboring associations and I recommend CRS highly and without reservation. In addition, I would be happy to speak to potential customers to address their questions and to talk in more detail about our project.

With many thanks,

Jerry Filbin
President
